Poland | Remote | Europe/Warsaw | Full-time or contract | Available ASAP

Profile

Product Owner with a software engineering background since 2019. Owned products in Octy and OneTouch, working directly with founders, planning implementation and forming development teams. Connect product decisions with hands-on mobile, backend and AI expertise. Develop CT Teacher as a personal EdTech prototype.

Core competencies

Product ownership, Stakeholder communication, Planning & decomposition, Technical feasibility, Hiring & mentoring, AI prototyping, Mobile / Backend / ML

Selected projects

Octy Marketplace

Product Owner / Team Lead | Octy Marketplace | Pre-production | Funding ended

A video-commerce marketplace with multi-chain crypto payments and loyalty experiments. Combined end-to-end product responsibility, direct founder communication and technical leadership.

- Owned the product as a whole, working directly with founders and translating product decisions into implementation plans and technical tasks.
- Formed the development team, hired and mentored two Flutter developers and a designer, and coordinated technical delivery.
- Connected marketplace and financial workflows: video discovery, seller verification, buyer-to-owner roles, internal balances, conversion and checkout using several crypto assets.
- Combined architecture and backend work with research into game-based loyalty using DQN/PPO; evaluated the ML approaches through simulation.

Technologies: NestJS, TypeScript, Prisma, PostgreSQL, Redis, Docker, Flutter, TensorFlow, DQN, PPO

OneTouch

Product Owner / Team Lead | Selected engagements | Pre-production | Funding ended

A real-estate marketplace with crypto escrow transactions. Combined product ownership and founder communication with team formation and backend implementation.

- Owned the product end to end and worked directly with founders, connecting the intended transaction flow to the development work.
- Formed the team and presented the technical solution to investors.
- Took full responsibility for the backend: listings, search, seller verification, KYC/AML-related workflows and purchase through escrow contracts on Ethereum and TON.

Technologies: FastAPI, Python, SQLAlchemy, Solidity, Ethereum, TON, Docker, Flutter

CT Teacher

Product Owner / Developer | Personal project

A personal AI learning-platform prototype. Own the concept, product direction and implementation, exploring a connected experience of exercises, video lessons and educational games.

- Define and develop the product as a whole, combining the learning experience, content workflows and technical implementation.
- Prototyped AI-generated exercises and variants, complete video lessons, speech synthesis and learning games.
- Developed the Python backend and Telegram/React client; explored content generation, rendering, access control and learner progress within a research prototype.

Technologies: Python, FastAPI, PostgreSQL, Redis, React, TypeScript, aiogram, Docker, AI integration, ffmpeg

Employment history

ScanChamp | Mar 2026 — present
Software Engineer · Flutter / ML / Backend

Project-based development | Aug 2025 — Mar 2026
Senior Flutter Developer

Octy Marketplace | Dec 2024 — Aug 2025
Flutter Team Lead · Backend ownership

Success Craft | 2024
Senior Flutter Developer

Developers Heaven | Within 2022–2024
Flutter Developer

Contract engagements | May 2022 — Dec 2024
Senior Flutter Developer / Team Lead

iTechArt Group | May 2021 — May 2022
Junior–Middle Flutter Developer

Gieksby Development / Secreate | Oct 2020 — May 2021
Junior Flutter / React Native Developer

SmartAppTechnology Limited | Jul 2019 — Oct 2020
Full Stack Web Developer

Education and languages

BSUIR, 2023 · Faculty of Computer-Aided Design · Electronics and Software Engineering
