Poland | Remote | Europe/Warsaw | Full-time or contract | Available ASAP

Profile

Applied ML at Junior level, supported by software engineering experience. Computer vision, OCR, datasets, model evaluation and mobile inference. Developed reinforcement learning models with TensorFlow/Keras and educational vision and sensor classifiers; integrated models into applications.

Core technologies

Computer vision / OCR, TensorFlow / Keras, TFLite / ONNX Runtime, OpenCV, Dataset evaluation, DQN / PPO, Python

Selected projects

ScanChamp

Software Engineer · Flutter / ML / Backend | ScanChamp | Released | Ongoing development

Computer vision, OCR and on-device inference for a document scanner started from scratch and taken to release; development continues.

- Tuned document-boundary, OCR and enhancement models; prepared datasets and compared model/runtime candidates with visual checks and stage timings.
- Tracked document/session identity and dataset splits; integrated mobile inference and diagnosed preprocessing, inference and postprocessing costs.

Technologies: Python, OpenCV, TFLite, ONNX Runtime, OCR, Dataset evaluation

Octy Marketplace

Flutter Team Lead · Backend ownership | Octy Marketplace | Pre-production | Funding ended

Reinforcement-learning research for a marketplace loyalty and discount system, evaluated in simulation before production.

- Developed DQN with replay buffer and target network and a PPO actor/critic approach in TensorFlow/Keras, using a custom Gym environment.
- Explored reward design and compared loyalty policies in simulation; built analysis tooling for training and policy behavior.

Technologies: Python, TensorFlow, Keras, DQN, PPO, Gym

Foot Neuro

Python / ML Developer | Academic project

Academic image-classification prototype for foot-condition assessment with batch processing and per-image confidence.

- Compared MobileNetV2, ResNet50 and EfficientNetB0 with transfer learning, fine-tuning, augmentation, regularization and cross-validation.
- Integrated batch image prediction and per-image confidence into PyQt6; used confusion matrices for model evaluation.

Technologies: Python, TensorFlow, Keras, Transfer learning, scikit-learn, Cross-validation

Selected projects continued

Tremor screening

Flutter / Backend / ML Developer | Academic project

Academic binary-classification prototype using smartphone accelerometer and gyroscope data for a screening recommendation.

- Built accelerometer/gyroscope collection, a Flask preparation API and a TensorFlow/Keras binary classifier returning a screening recommendation.

Technologies: Python, TensorFlow, Keras, Sensor data, Flask

CT Teacher

Full Stack Developer | Personal project

Personal research into AI-generated exercises, video lessons, speech and educational games.

- Researched AI exercise/video-lesson generation and speech synthesis; integrated model tooling and rendering into a personal educational prototype.

Technologies: Python, AI / LLM integration, ONNX Runtime, MLX, Hugging Face tooling, ffmpeg

Employment history

ScanChamp | Mar 2026 — present
Software Engineer · Flutter / ML / Backend

Project-based development | Aug 2025 — Mar 2026
Senior Flutter Developer

Octy Marketplace | Dec 2024 — Aug 2025
Flutter Team Lead · Backend ownership

Success Craft | 2024
Senior Flutter Developer

Developers Heaven | Within 2022–2024
Flutter Developer

Contract engagements | May 2022 — Dec 2024
Senior Flutter Developer / Team Lead

iTechArt Group | May 2021 — May 2022
Junior–Middle Flutter Developer

Gieksby Development / Secreate | Oct 2020 — May 2021
Junior Flutter / React Native Developer

SmartAppTechnology Limited | Jul 2019 — Oct 2020
Full Stack Web Developer

Education and languages

BSUIR, 2023 · Faculty of Computer-Aided Design · Electronics and Software Engineering

Russian — native; English — B2; Arabic — A1
